Psychometric tests for Turkish

You can install and run the tests following the instructions here: https://github.com/MultiplEYE-COST/MultiplEYE-psychometric-tests/tree/main?tab=readme-ov-file

You can ignore translation instructions. All relevant files are in the TR folder on Switch Drive (this folder). In case you download this file and need the link to the Switch drive again:

https://drive.switch.ch/index.php/s/i9ecUhd8ygcRDMg?path=%2FPsychometric%20tests%2Flanguages%2FTR

Please let me know if you accidentally delete or change any file or encounter any mistakes/typos in translations. My email address is aysglozkn@gmail.com.

After installation:

- Please download the TR folder (this folder) in Switch Drive to your computer. Please don't change the content of the online folder.
- You can copy the TR folder to the /MultiplEYE-psychometric-tests/languages/ folder on your computer (the one from GitHub).
- The necessary screenshots are in the relevant folders (/TR/WMC/instructions and /TR/PLAB). However, you may need to take screenshots fitting your screens.
    - Please don't change file names; you can overwrite the existing ones.
    - You can create images following the Guidelines, "6.1 Adaptation of the psychometric tests to other languages."
    - You can ignore translation instructions; take screenshots from the Word file for WMC (TR/instructions folder) and the PowerPoint file for PLAB (TR/PLAB folder), as explained in the Guidelines.
    - You can get the most recent version of the Guidelines from the link below:

      https://drive.switch.ch/index.php/s/i9ecUhd8ygcRDMg?path=%2FGuidelines
- For the Stroop test, you will need to place stickers for letters K, M, and S (representing Kırmızı, Mavi, Sarı, respectively) at the bottom-right of the keyboards.
    - You will need to use either the TRF layout or the standard EN keyboard layout. There are two folders for each. The relevant keys are marked in the layout images. A detailed explanation of the layouts is in the text file in the Stroop-Flanker folder.
    - To run the tests, you will need to select one that fits the keyboard in your lab. Copy the files, Stroop_practice_trials_tr.xlsx and Stroop_practice_tr.xlsx to the /MultiplEYE-psychometric-tests/languages/TR/Stroop-Flanker folder (the one from GitHub).
    - Those Excel files have different correct keys depending on the keyboard layout, and the file names shouldn't be changed.
- Before the actual data collection, please ensure you have the recent material. There may be changes due to changelog or feedback from labs.
